

# Business Tactix

http://www.businessstactix.co.uk

**The brief** – To create an accessible and easy to navigate website with a limited budget.

## The Project

This project is built on a template developed by RealityHouse. The logo, images and copy were provided by the client to keep costs low. RealityHouse then created a website structure relevant to the content supplied and a design which reflected the needs of the Business Tactix brand.

## Budget for similar site

£975 (for 10 page site) + cost of images

## Result

This very straightforward site is corporate, professional and low cost. The template is available to other clients with different images and copy.

## Client Response

"I needed a website and RealityHouse provided a quick, easy and affordable solution. To keep costs low I found the images I wanted to use and provided the copy. RealityHouse built the website and helped me to purchase a domain name and low cost hosting. It was all very easy"
